Exercise 03: Analysis of Algorithms

Pre-Lab Exercise

Tasks

Fill the missing codes for `sort.c` using the codes from the lecture slides or from the optional exercise in `params03.exer2.c`. The aim of the Pre-Lab exercise, is only to let you familiarize yourself with the sorting algorithms discussed in the lecture.

Run the `make` command on the terminal to test your code. It should generate results similar to the contents of `expected.txt`. As a PreLab exercise, the answer is provided in the `answers` subfolder.

Submission

No don't need to submit anything for this PreLab exercise. Just familiarize with the codes that will be used for InLab exercise.
